### **Concept**

“Harmonic Balance (Grenada)” is a spiritual condition that is not static, but dynamic, in which the conquest of balance is a process in continuous evolution. The introspective journey made by Paolo Rossetto is sublimated in the ideal union between Man and Nature. Man is reflected in Nature and realizes that he is an indispensable element of it. In this sense, the synthesis that occurs between them is an irreversible reaction, which happens in their innermost fibres, distorting perception and shaping memory.
